## SUMMARY

I have been a Data Engineer and Full stack developer for 3 years. I have extensive knowledge on databases and best engineering practices include handling and logging errors, monitoring the system, building data streaming pipelines, understanding what is necessary to scale up, maintaining data cleaning, and ensuring a deterministic pipeline. Versatile, self-directed, and highly effective with minimal supervision. Self-learner and passionate about exploring new technologies.

## WORK EXPERIENCE

### FPT telecom / 2016 - 2017

Currently, I am working at FPT Telecom, as a data engineer, in PayTV Center project. My main job is to manipulate the data system (RDBMS, NoSQL, hadoop ecosystem,...). Storing and processing over 70M records log a day from service for the development of analytical system, business intelligence, recommendation for user.

### Peacesoft solution corporation / 2014 - 2016

Before FPT Telecom, I spent over a year as a full stack developer in a project called Boxme Ecommerce Fulfillment. The project was built on restful API and other optimization technologies.

## AWARDS

**Top 10 TOPICA Million 2014**

## REFERENCE

### Pham Duy Hoang Chuong

Major : Team Leader BOXME

Phone : 01649672080
