PROFESIONAL PROFILE

I am a data engineer. I began to love the work of a data engineer two years ago, while I was a full stack developer. Then I decided to become a data engineer and now I have a year of experience in position data engineer .

WORK EXPERIENCE

Peacesoft solution corporation / 2014 - 2016

I spent over a year as a full stack developer in a project called BOXME (an ecommerce logistic project). The project was built on restfull API technology and other optimization technologies.

FPT telecom / 2016 - 2017

I am working at FPT, as a data engineer, in the Pay TV Center project. My main job is to manipulate the data system (RDBMS, NoSQL, hadoop ecosystem, ...). Storage and processing of the Logs arising from services for the development of analytical systems, business intelligence, recommendations for users.

AWARDS

Top 10 TOPICA Million 2014
